

CONTENTS OF JOURNAL OF ANIMAL AND FEED SCIENCES

Volume 4

Vol. 4, No 1

1995

Herbage intake by Churra ewes grazing at two different sward heights. C. Valdés, A.R. Mantecón, F.J. Giráldez and F.F. Bermúdez (León, Spain)	1
Growth rate and carcass value of three types of crossbred pigs fed <i>ad libitum</i> diets with different protein and energy contents J. Kulisiewicz, J.L. Sokół, A. Rekiel, R. Inarski and P. Lenartowicz (Brwinów, Poland)	11
Characterization of cobalt-copper antagonism in the study of copper-stimulated growth in weanling pigs E.T. Kornegay, W. Zhou, J.W.G.M. Swinkels and C.R. Risley (Blacksburg, USA)	21
Plasma thyroxine and triiodothyronine concentrations in growing and adult meat type birds fed "00" rapeseed – containing diet during the first seven weeks of life E. Świerczewska, B. Reklewska and A. Siennicka (Brwinów, Poland)	35
Compensatory growth in broilers following water restriction E. Kapkowska (Kraków, Poland) and R.W. Gerry (Orono, USA)	43
Polymorphism of proteins in the pretransferrins (Ptf) subregion of blood serum and reproductive performance of turkeys A. Brodacki (Lublin, Poland), J. Jankowski and A. Faruga (Olsztyn, Poland)	55

- A note: an approach to estimate efficiency of energy utilization for milk production
 A. Chwalibog (Frederiksberg C, Denmark) 63
- A note on the chemical composition of the cotyledons and seed coat of three species of sweet lupin
 S. Smulikowska, J. Wasilewko and A. Mieczkowska (Jabłonna, Poland) 69

Vol. 4, No 2**1995**

- How does phytic acid decrease the absorption of elements in the digestive tract?
 T. Szkudelski (Poznań, Poland) 77
- Effects of supplemental fat for high yielding cows at first stage of lactation on milk yield and composition
 T. Szulc, J. Preś and A. Dobicki (Wrocław, Poland) 83
- Blue lupin seeds in diets for fattening lambs
 M. Urbaniak (Poznań, Poland) 95
- The efficiency of protein and energy utilization by growing pigs fed diets containing both full-fat rape seeds and rapeseed meal
 S. Raj, M. Kotarbińska, H. Fandrejewski and K. Chabiera (Jabłonna, Poland) 107
- A note on the effect of feeding different fats during the growing periods on the final fatty acid composition of back fat in pigs
 T. Jaśkiewicz and S. Matyka (Lublin, Poland) 119
- Studies on enzymatic fractionation, chemical composition and biological effects of dietary fibre in rape seed (*Brassica napus* L.). 1. Chemical composition of seeds and characteristics of soluble and insoluble dietary fibre of spring and winter type varieties of double improved oilseed rape
 P. Ochodzki, M. Rakowska (Radzików, Poland), Bjerregaard Ch. and H. Sørensen (Fredriksberg C, Denmark) 127

Studies on enzymatic fractionation, chemical composition and biological effects of dietary fibre in rape seed (*Brassica napus* L.). 2. Influence of rape seed dietary fibre on digestibility of protein and organic matter using unprocessed and heated full fat rape seed and isolated dietary fibre fractions added to rat diets.

P. Ochodzki, M. Rakowska, B. Rek-Ciepty (Radzików, Poland),
Ch. Bjerregaard and H. Sørensen (Frederiksberg C, Denmark) 139

Studies on enzymatic fractionation, chemical composition and biological effects of dietary fibre in rape seed (*Brassica napus* L.). 3. Degradation of dietary fibre components of rape seed by microbial enzymes and its influence on nutrient utilization by rats and chickens

P. Ochodzki, M. Rakowska, B. Rek-Ciepty (Radzików, Poland),
Ch. Bjerregaard and H. Sørensen (Frederiksberg C, Denmark) 153

Effect of *Lactobacillus salivarius* administration on microflora in the crop and caeca of broiler chickens

V. Rada, M. Marounek, I. Rychlý, D. Šantrůčková and K. Voříšek
(Uhřetěves, Czech Republic) 161

Vol. 4, No 3

1995

Yeast cells as a feed supplement for cattle. 1. Liquid viable yeast cultures for calves

J.A. Strzetelski, T. Ernest, J. Maciejewicz-Ryś, K. Maciaszek (Balice, Poland), J. Kowalczyk (Jabłonna, Poland) and E. Lipiarska (Balice, Poland) 171

The effect of dolomite, limestone and zinc oxide as feed additives on utilization of organic matter and minerals by young fattening cattle

S. Kinal and J. Preś (Wrocław, Poland) 183

Ileal and faecal digestibility of Jerusalem artichokes (*Helianthus tuberosus* L.) in pigs

J. Ly, J.L. Reyes and V. Figueroa (La Habana, Cuba) 195

Intestinal nitrogen flow, total nitrogen and ¹⁵N balance in pigs labelled intravenously with ¹⁵N-leucine and fed a meat meal diet

R. Schadereit, K. Krawielitzki (Rostock, Germany), T. Żebrowska,
J. Kowalczyk (Jabłonna, Poland) and F. Kreienbring (Rostock, Germany) 207

- Degradation of dietary fibre polysaccharides of rye in the intestinal tract of growing pigs used as a model animal for studying digestion in humans
M. Cyran, M. Rakowska (Radzików, Poland), J. Wasilewko and L. Buraczewska (Jabłonna, Poland) 217
- Performace of young geese fed diets containing rye and enzyme preparations
E. Pakulska, H. Bielińska (Kołuda Wielka, Poland) and S. Smulikowska (Jabłonna, Poland) 229
- Effect of supplementary feeding on the gastrointestinal strongylid eggs shedding in grazing pregnant Merino ewes
J. Ferre, C.M. Brusa, E. Manzanera, F.A. Rojo-Vázquez, O. Buratovich and A.R. Mantecón (León, Spain) 237
- Growth hormone secretion in anestrus ewes subjected to prolonged stressful stimuli
F. Przekop (Jabłonna, Poland), P. Krejčí and J. Slaba (Uhřetěves, Czech Republic) 247
- The influence of cellulose, starch and different sources of nitrogen on the growth of rumen ciliate protozoon *Epidinium ecaudatum in vitro*
T. Michałowski (Warszawa, Jabłonna, Poland) 255

Vol. 4, No 4

1995

- The influence of enzyme preparations on the nutritional value of cereals for poultry. A review
H. Jeroch, S. Dänicke (Haale/Saale, Germany) and J. Brufau (Reus, Spain) 263
- Yeast cells as a feed supplement for cattle. 2. Effect of liquid yeast cultures on digestive processes in the rumen of bulls
J.A. Strzetelski, J. Maciejewicz-Ryś, R. Ryś (Balice, Poland), J. Kowalczyk (Jabłonna, Poland), B. Niwińska, T. Stasiniewicz and K. Maciaszek (Balice, Poland) 287

The effects of calcium and sodium loading on organic matter digestibility and mineral absorption in sheep. 1. Digestion in the forestomachs and small intestine H. Leontowicz, R. Krzemiński, M. Leontowicz, G. Kulasek, M. Gralak and V. Leśniewska (Warszawa, Poland)	299
The effects of calcium and sodium loading on organic matter digestibility and mineral absorption in sheep. 2. Absorption of minerals H. Leontowicz, M. Gralak, M. Leontowicz, G. Kulasek, R. Krzemiński and V. Leśniewska (Warszawa, Poland)	311
Secretion of nitrogen compounds into the isolated caecum and colon of sheep B. Skiba, J. Kowalczyk and T. Żebrowska (Jabłonna, Poland)	321
Influence of bovine colostrum thermisation on intestinal immunoglobulin transfer in newborn lambs J.F. Grongnet (Rennes, France), G.T. Dos Santos (Parana, Brasil), M. Piot and R.Toullec (Rennes, France)	333
Predicting ruminal degradability of lucerne and grass forage protein from <i>in vitro</i> solubility with non-specific bacterial protease or pancreatin A.M. Antoniewicz and J. Kosmala (Kraków, Poland)	341
Determination of allantoin in blood by high performance liquid chromatography with pre-column derivatization M. Czuderna and J. Kowalczyk (Jabłonna, Poland)	351
Author index, Volume 4	359
Contents of Journal of Animal and Feed Sciences, Volume 4	365
