

JOURNAL OF ANIMAL AND FEED SCIENCES

Vol. 14, Suppl. 1

CONTENTS

2005

PREFACE	13
 INVITED PAPERS	
Metges C.C. and H.M. Hammon – Nutritional programming: prenatal nutritional effects on the regulation of growth and metabolism	15
Jakobsen K., P.K. Theil and H. Jørgensen – Methodological considerations as to quantify nutrient and energy metabolism in lactating sows	31
Flachowsky G. and H. Böhme – Proposals for nutritional assessments of feeds from genetically modified plants	49
Pisulewski P.M., M. Franczyk and R.B. Kostogrys – Health-related effects of nutritionally modified foods of animal origin	71
Sawosz E., A. Chwalibog, T. Niemiec, I. Kosieradzka and J. Skomial – Effect of nutrition on oxidative stress	87
Zabielski R., D. Laubitz, J. Woliński and P. Guilloteau – Nutritional and hormonal control of gut epithelium remodeling in neonatal piglets	99
Guilloteau P. and R. Zabielski – Gut regulatory peptides as mediators of gastrointestinal tract growth, motility and development of secretion in young ruminants	113
Pierzynowski S.G., D. Kruszewska, S. Rengman, O. Fed’kiv, M. Dąbek, A. Hotowy, E. Werpachowska and B.R. Weström – Relations between pig growth and regulatory mechanism of pancreas - facts and hypotheses	139
Huhtanen P. – Critical aspects of feed protein evaluation systems for ruminants	145
Jouany J.-P., A. Yiannikouris and G. Bertin – How yeast cell wall components can alleviate mycotoxycosis in animal production and improve the safety of edible animal products	171
Skiba G. – Physiological aspects of compensatory growth in pigs	191
Madej A., M.T. Madsen, Y. Brandt, H. Kindahl and S. Einarsson – Stress-related effects on reproductive capacity of pigs	205

OFFERED SHORT PAPERS

Ruminants	213
Bełżecki G. and T. Michałowski – Effect of selected rumen fauna on the digestion of starch and outflow of α -glucose polymers from the reticulo-rumen of sheep	215
Bilik K. and J.A. Strzetelski – Effect of a simplified “stair-step” feeding system on the performance of Red-and-White \times Holstein-Friesian heifers	219
Borys B., A. Borys and J.J. Pająk – The fatty acid profile of meat of suckling lambs from ewes fed rapeseed and linseed	223
Borys B. and A. Jarzynowska – Effects of vitamin E supplemented to rapeseed and linseed diets on slaughter value of lambs	227
Borys B., J.J. Pająk and A. Borys – The effect of rapeseed fed to suckled ewes on the fatty acid profile of lamb meat	231
Cieślak A., A. Potkański, J. Kowalczyk, M. Szumacher-Strabel, K. Czaczyk, A. Gubała, M. Janicki and E. Szymankiewicz – Methane production in <i>in vitro</i> studies as an effect of different additives to grass-clover silage	235
Ćwiek A. and F. Borowiec – Effect of dietary fat source on nutrients digestibility and rumen fermentation in sheep	239
Darul K. and H. Kruczyńska – Changes in selected biochemical blood parameters in dairy cows after administration of melatonin	243
Dymnicka M., J.A. Strzetelski, J. Klupczyński, J. Miciński and A. Łozicki – The fatty acid profile of <i>M. thoracis</i> and <i>M. semitendinosus</i> intramuscular fat	247
Faix Š., L. Leng, J.J. Pająk, K. Boldižárová, Z. Faixová, M. Czauderna and J. Kowalczyk – Short-term vasopressin analogue treatment does not influence the nitrogen balance in sheep	251
Gabryszuk M., M. Czauderna, M. Gralak and Z. Antoszkiewicz – Effects of pre- and postpartum injections of Se, Zn and vitamin E on their concentration in ewes milk ...	255
Jurkiewicz A., J.A. Strzetelski, J. Kowalczyk and K. Bilik – Concentrate-enriched diets for calving heifers in the periparturient period increase milk yield and improve blood metabolite profile	259
Kapica M., J.L. Valverde Piedra, I. Puzio, M. Bieńko, S.E. Szymańczyk and R.P. Radzki – The effect of feeding raw and extruded feed containing soyabean meal on pancreatic juice digestive enzyme activities in young calves	263
Kowalski Z.M., P. Micek, M. Łopuszańska-Rusek and E. Ćwikilewicz – Effect of partly replacing dietary concentrate by beet pulp on milk yield and composition in early lactating cows	267
Krzywiecki S., R. Bodarski, J. Preś and W. Łuczak – The relationship between cation-anion differences in dairy cow diets and some blood indices levels and milk composition	271

Matras J., B. Bujanowicz-Haraś and J. Wojtasik - Influence of balancing mineral nutrition of dairy cows on milk yield and the content of some minerals in blood and milk	275
Micek P., Z.M. Kowalski and F. Borowiec – Effect of barley cultivar on the chemical composition and rumen degradability of dry matter, protein and starch	279
Michalak S. and A. Potkański – Effect of extrusion of rapeseed oilmeal on rumen degradability and intestinal digestibility	283
Michałowski T. – The distribution of fibrolytic activity in the rumen of ciliate-free and faunated sheep	287
Niwińska B. – Duodenal morphology in calves fed liquid diets with different frequency	291
Nowak W. and S. Wylegała – The effect of rapeseed oil on the ruminal degradability and intestinal protein digestibility of rapeseed meal, soyabean and lupin seed	295
Osięglowski S., B. Niwińska, J.A. Strzetelski and K. Bilik – Performance of calves as related to the proportion of plant protein in milk replacer and to feeding frequency ...	299
Petrović V., K. Boldižárová, Š. Faix, J. Kowalczyk, M. Czauderna, M. Mellen and L'. Leng – Excretion routes and distribution of selenium in sheep tissues after selenite loading	303
Potkański A., A. Cieślak, M. Szumacher-Strabel, S. Wylegała, K. Raczkowska-Werwińska, A. Gubała and J. Kowalczyk – The stability of silage containing biological and chemical additives assessed using a <i>Rusitec</i> system	307
Skórko-Sajko H., J. Tywończuk, J. Skomial, J.J. Pająk, D. Minakowski and J. Sajko – Nutritional value of galega (<i>Galega orientalis</i> Lam.) forage and silage for ruminants	311
Wylegała S., W. Nowak and R. Mikula – The effect of <i>Saccharomyces cerevisiae</i> on the <i>in vitro</i> degradability of maize grain, cellulose and wheat straw dry matter	315
Zymon M., J.A. Strzetelski and J. Kowalczyk – The effect of fish oil in calf diets on the fatty-acid content of <i>Musculus thoracis</i> intramuscular fat	319
Pigs	323
Antuszewicz A., E. Świąch and T. Żebrowska – Glucose, insulin and cholesterol levels in blood of growing pigs given diets with various sources of fibre	325
Barowicz T., M. Pieszka, M. Pietras and W. Kędzior – The effect of serum concentration of leptin in fatteners on their productivity	329
Böhme H., B. Hommel and G. Flachowsky – Nutritional assessment of silage from transgenic inulin synthesizing potatoes for pigs	333
Broll H., J. Zagon, A. Butschke, A. Leffke, A. Spiegelberg, H. Böhme and G. Flachowsky – The fate of DNA of transgenic inulin synthesizing potatoes in pigs	337

Flis M. and W. Sobotka – Fine particle size and enzyme supplementation as factors improving utilization of protein from diets with lowered protein contents by pigs	341
Furgal-Dierzuk I. – The effect of different dietary fibres on microbial population and short-chain fatty acids concentration of the caecum in pigs	345
Grela E.R., A. Czech and R. Chachaj – Effect of L-carnitine diets on performance and blood metabolites in sows	349
Hanczakowska E. and M. Świątkiewicz – Gallic acid or sage extract supplement in feed mixtures for finishing pigs	353
Kasprowicz M., A. Frankiewicz and M. Urbaniak – Effect of different levels of faba bean in diets on growth performance of young pigs	357
Krasucki W., Z. Mroz and K. Szafran – Effects of linseed and oat in antibiotic-free diets on the gut health, mucosal integrity and performance of piglets	361
Kuśnierek W. and A. Potkański – Total and ileal digestibility of protein and amino acids of soyabean meal extruded at 140 and 160°C by pigs	365
Lipiński K., C. Purwin, J. Tywończuk, Z. Zduńczyk, M. Wróblewska, Ł. Łaniewska-Trokenheim and I. Warmińska-Radyko – Effects of feed additives on nutrient digestibility and the bacterial status of faeces in pigs	369
Lubowicki R., A. Kotlarz and I. Jaskowska – Effect of cultivar and harvest year on the composition of yellow lupin seeds	373
Matyjek R., R. Zabielski, Z. Długołęcka and T. Żebrowska – Exocrine pancreatic secretion and plasma leptin and insulin levels in growing pigs of different genotypes	377
Mroczek I., A. Frankiewicz, A. Łyczyński and E. Rzoszińska – Evaluation of the effectiveness of acidifying preparations in piglet rearing	381
Mroczek I., A. Frankiewicz and M. Selwet – The effect of acidifying additives on the microbiological stability of feed mixtures	385
Raj St., G. Skiba, D. Weremko, H. Fandrejewski, W. Migdał and F. Borowiec – Influence of breed and body weight of pigs on the fatty acid profile of <i>Musculus longissimus dorsi</i>	389
Sawosz E., A. Chwalibog, J. Skomial, I. Kosieradzka and A.J. Zięcik – The effect of dietary energy concentration on the hormone profile and lipid metabolism in growing pigs	393
Skiba G., St. Raj, D. Weremko and H. Fandrejewski – Effect of diets differing in fibre content fed during the early growth stage of pigs on subsequent energy and nutrient digestibility	397
Skiba G., St. Raj, D. Weremko, H. Fandrejewski and J. Woliński – The enzymatic activity of the small intestine mucosa of young pigs as affected by high fibre diets fed after weaning	401
Świątkiewicz M. and E. Hanczakowska – The effect of vitamin E on the quality of meat of pigs fed maize grain silage	405

Urbańczyk J., E. Hanczakowska and M. Świątkiewicz – The effect of organic feeding on carcass and meat quality of fattening pigs	409
Weremko D., H. Fandrejewski, St. Raj, G. Skiba and M. Czauderna – Relationship between mineral and protein deposition in restricted and realimented pigs	413
Yao G., M. Ceregrzyn, J. Woliński and R. Zabielski – Alpha-ketoglutarate reduces duodenal myoelectric disturbances induced by <i>E. coli</i> enterotoxin in pigs	417
Poultry	421
Barteczko, J., E. Kapkowska, I. Ratych, F. Borowiec and R. Augustyn – The effect of supplementing vitamin C and sodium to diets on the fatty acid profile of goose egg yolk lipids	423
Boruta A. and J. Niemiec – The effect of diet composition and length of storing eggs on changes in the fatty acid profile of egg yolk	427
Brzóska F., S.B. Buluchevskij, B. Śliwiński and K. Stecka – Preliminary study of the microbial spectrum of the digestive tract in broilers fed diets with and without antibiotic supplementation	431
Czauderna M., J. Kowalczyk, P.M. Pisulewski and K. Korniluk – Influence of dietary conjugated linoleic acid (CLA) on the fatty acid content and CLA profile of egg yolks in laying hens	435
Fabijańska M., M. Boruta, J.L. Sokół, A. Hermanowska and M. Chojecka – Effect of naked oats and enzyme supplementation on performance of hens and quality traits of eggs ...	439
Frątczak M., D. Józefiak and A. Rutkowski – Choice feeding for laying guinea fowl parent flocks in a free-range system	443
Józefiak D. and A. Rutkowski – The effect of supplementing a symbiotic, organic acids, or β -glucanase to barley-based diets on the performance of broiler chickens	447
Juśkiewicz J., D. Mikulski, J. Jankowski and Z. Zduńczyk – Gastrointestinal responses of turkeys to the addition of exogenous xylanase and glucanase to diets	451
Kaszuba A., J. Koreleski, S. Świątkiewicz, W. Szczurek and A. Lemme – The relative effectiveness of liquid MHA-FA compared with DL-methionine in broiler chickens - a dose-response experiment	455
Koreleski J. and S. Świątkiewicz – Effect of fish oil and vitamin E in the diet on the fatty acid composition of breast meat in broiler chickens	459
Kwiecień M. – The influence of hulless barley on selected physical and chemical parameters in broiler chicken femur bones	463
Lemme A., K. Kozłowski, J. Jankowski, A. Petri and Z. Zduńczyk – Responses of 36- to 63-day-old BUT Big 6 turkey toms to graded dietary methionine+cysteine levels	467
Niemiec J., M. Stępińska, J. Riedel, and P. Szeleszczuk – The effect of feeding ochratoxin A-contaminated diet to broiler breeding flocks on the chickens performance	471

Orłowski A., M. Bielecka, W. Smoragiewicz, S. Kask and J. Jankowski – Response of broiler chickens on <i>Lactobacillus</i> and <i>Bifidobacterium</i> probiotic strains	475
Pisarski R.K., I. Pijarska and H. Malec – The effect of feeding broiler chickens during transportation on yolk sac, body weight and anti-IBDV level in blood	479
Smulikowska S., K. Śliżewska, J. Biernasiak, A. Mieczkowska and P. Michałowski – The effect of a probiotic composed of <i>Lactobacillus</i> and yeasts, and of flavomycin on the performance and faecal microflora of broiler chickens	483
Szczurek W. – Digestible amino acids and enzymes in broiler diets: effects on carcass composition of two broiler strains	487
Szymczyk B., P. Hanczakowski and W. Szczurek – Performance and intestinal viscosity in broilers fed diets containing dehulled or naked oats and enzymes	491
Świątkiewicz S. and J. Koreleski – The effects of particulate limestone and 25-hydroxy-cholecalciferol in broiler chicken diets on the mechanical properties of bones	495
Tarasewicz Z., D. Szczerbińska, M. Ligocki, A. Dańczak, D. Majewska and K. Romaniszyn – The effect of a low-protein diet on Japanese quail rearing, egg quality and hatchability	499
Wertelecki T. and D. Jamroz – The effect of protein level in early feeding on yolk sac nutrient concentrations in chickens	503
Wiąz M., W. Mroczyk, D. Józefiak and A. Rutkowski – Composition of rapeseed cakes and meals manufactured under different technological conditions.	507
Zduńczyk Z., J. Jankowski and J. Juśkiewicz – Performance and intestinal parameters of turkeys fed a diet with inulin and oligofructose	511
Żyła K., M. Mika, J. Koreleski and S. Świątkiewicz – Degree of phytate conversion and type of phytase A modify production parameters and egg shell quality in laying hens	515
Other Species	519
Antuszewicz A., M. Taciak and T. Żebrowska – The short-chain fatty acid content in the caecal digesta of rats fed diets with various sources of fibre	521
Arkuszevska E. – The chromium concentration in organs and tissues of rats fed a diet enriched in chromium	525
Czauderna M., J. Kowalczyk, E. Bulska, K. Boldiżarova, K.M. Niedźwiedzka, A. Rusczyńska and E. Leng – Effect of dietary CLA isomers on selenium, zinc, copper, chromium, magnesium and calcium levels in rat liver	529
Czauderna M., J. Kowalczyk, K. Korniluk, I. Wąsowska and B. Pastuszewska – Dietary conjugated linoleic acid isomers and selenium affect the fatty acid profile in rat liver	533

CONTENTS	11
Czerwiński J., H. Leontowicz, M. Leontowicz and M.A. Gralak – Response of rats to a moderate intake of soyabean lectin	537
Frejnagel S., Z. Zduńczyk and M. Wróblewska – Response of rats to grapefruit flavonoids and inulin fed singly or in combination	541
Kosieradzka I., E. Sawosz, J. Skomiał and J. Szopa – Transgenic potato tubers with overexpression of 14-3-3 protein in growing rat diets. 1. Selected hormone activities and liver function status	545
Kosieradzka I., E. Sawosz, J. Skomiał, J. Szopa, I. Dudkowska and B. Pastuszewska – Transgenic potato tubers with overexpression of 14-3-3 protein in growing rat diets. 2. Redox indices in blood and brain	549
Niemiec T., E. Sawosz and A. Chwalibog – Effect of high doses of L-ascorbic acid on the antioxidative/oxidative state in the rats	553
Szymeczko R., E. Świąch, K. Burlikowska and Z. Podkówka – Content and apparent ileal digestibility of nutrients in diets fed to breeding polar foxes over the non-mating season	557
Methods	561
Czauderna M., J. Kowalczyk, K. Korniluk and I. Wąsowska – Improving the analysis of fatty acids using a combination of gas chromatography and Ag ⁺ liquid chromatography	563
Kański J. and Z.M. Kowalski – Protein degradability of silages in the rumen estimated by NIRS	567
Ludwin J., Z.M. Kowalski and M.R. Weisbjerg – The use of the <i>in vitro</i> filter bag method for predicting digestibility of forages	571
Simon O., D. Taras and W. Vahjen – Nutritional impact on intestinal bacterial communities of pigs studied by molecular biology techniques	575
Author index	579
